

ONYEANUSI CHIEDOZIE ARTHUR

Full Stack Developer

Lagos, Nigeria | +234 702 647 6769 | arthuronyeanus@gmail.com [Github](#) | [Portfolio](#) | [LinkedIn](#)

SUMMARY

I am a Full-Stack Developer with over two years of experience building interactive backend systems and user friendly frontend interfaces. Driven by my background in Computer Science, my transition from frontend engineering to full-stack development was fueled by a deep curiosity about system architecture and data flow. My technical approach is rooted in first-principles thinking: strip away the framework, isolate the core logic.

SKILLS

Hard Skills: JavaScript | TypeScript | React.js | Next.js | Node.js | Express.js | Prisma | TailwindCSS

Database & Tools: MySQL | MongoDB | Git | GitHub | EJS | Vercel | Zoho Automation

Soft Skills: Problem-solving | System Architecture | Analytical Thinking | Collaboration | First-Principles Analysis

EXPERIENCE

Moon & Earth Auto <i>IT Lead & Digital Platforms Manager</i> 2026 – Present	Jan	Enoverlab <i>Frontend Developer</i> 2024 – June 2025	Dec
- Engineered and deployed the company’s official web platform from scratch, improving lead capture efficiency by 35% through an optimized, premium user experience. - Integrated Zoho CRM and business automation pipelines, cutting manual data entry for the sales team by 85% and streamlining incoming customer workflows.		- Developed and launched a responsive web application using React.js, Next.js, Strapi and TailwindCSS, strictly adhering to production timelines. - Collaborated closely with UI/UX designers and Product Managers to optimize user flows, which successfully increased overall web platform accessibility scores by 40%	

FEATURED PROJECT

Swap-yard Full stack Developer	- Built a scalable backend monolithic marketplace web application, deliberately refining backend engineering skills and mastering core system design from first principles. - Designed relational database schemas to handle multi-table joins and indexing, and designing systems to ensure query is optimal by including cron jobs to reduce database load - Live Link: swapyard-monolith.vercel.app
